Kaiser Permanente - Raleigh, NC**1995 - 1998**

RN in multi-practice HMO. Provided care for Family Practice, Internal Medicine, OB/GYN, Pediatrics, Endoscopy, Surgery, Oncology and ENT clinics.

WakeMed Cary - Cary, NC**1992 - 1995**

RN on Medical/Surgical unit. Assumed total care for patients with a variety of diagnoses. Cared for patients immediately post-op.

**Santa Clara Valley Medical Center - San Jose, CA
Orlando Regional Medical Center - Orlando, FL****1984 - 1991**

Primary care RN on level 3-labor and delivery units. Provided total care to mother and newborn including fetal monitoring and I.V. therapy. Circulated and assisted physician with Cesarean sections. Taught childbirth classes.

CLINICAL RESEARCH

TRX4_DM_018_US_10 DEFEND-2: Durable Response Therapy Evaluation for Early or New-Onset Type 1 Diabetes

Phase 3 double blind placebo controlled clinical trial to determine the safety and effectiveness of a 8 day infusion of oteelixumab in preserving pancreatic beta cell function in patients with newly diagnosed type 1 diabetes.

Role: Sub Investigator; Study Coordinator

FL3X Pilot and Feasibility Study (PI: Mayer-Davis, EJ) 3/15/2010 – 2/28/2012 NIH (1R21DK085483-01)

The goal of the study is to determine the feasibility and short-term efficacy of an intervention using motivational interviewing along with current communication technologies in improving adherence to diabetes self-care tasks and improving metabolic status in high risk youth with type 1 diabetes.

Role: Study Coordinator

TrialNet Natural History Study of the Development of Type 1 Diabetes

TN-01 Natural History Phase 1, 2, and 3 (PI: Schatz, D) NIH

The goal of the study is to elucidate the risk factors associated with the development of type 1 diabetes in relatives of individuals with type 1 diabetes.

Role: Study Coordinator

TN-07 Oral Insulin (PI: Schatz, D) NIH

The goal of this placebo-control double-blinded clinical trial is to determine the effect of oral insulin in prevention of type 1 diabetes in non-diabetic relatives of patients with type 1 diabetes who are positive for insulin antibodies.

Role: Study Coordinator

H80-MC-GWBQ Safety and Efficacy of Exenatide as Monotherapy and Adjunctive Therapy to Oral Antidiabetic Agents in Adolescents with Type 2 Diabetes

The goal of the study is to compare glycemic control, as measured by HbA1c, between adolescent subjects with type 2 diabetes treated with exenatide with adolescent controls not receiving drug

Role: Study Coordinator

International Growth Study (KIGS) Pfizer, Inc.

The goal of the study is to assess the long-term safety of Genotropin and the growth responses of children treated with Genotropin.

Role: Study Coordinator

ANSWER NovoNet Growth Hormone Registry; Norditropin, Inc.

The goal of the study is to assess the long-term safety of Norditropin and the growth responses of children treated with Norditropin.

Role: Study Coordinator

PRESENTATIONS AND PUBLICATIONS

- ASMBs APP Assessment Based Certificate for Obesity Medicine for the Bariatric Patient faculty 2024
- ASMBs co-chair for APP networking Session 2024

- ASMBBS annual meeting invited speaker APP symposium 'Revision vs Obesity Medication in the Post Bariatric Patient with Weight Regain' 2024
